

SYSTEMS ARCHITECT MANAGER

PROFESSIONAL SUMMARY

Technology leader and enterprise solutions architect with 10+ years of experience designing, developing, and integrating scalable applications and platforms within the financial services industry. System Architect Manager for a credit union serving more than 81,000 members, where I have designed technology platforms that have scaled alongside the organization's growth from approximately \$500 million to \$1.3 billion in assets. Lead application architecture, software development, data platform architecture, and developer growth initiatives while overseeing 40+ production applications and 10 production databases. Recognized for designing efficient, maintainable, and well-documented systems that reduce operational overhead, improve business processes, and scale to support long-term organizational growth.

TECHNICAL SKILLS

- **Languages:** C#, T-SQL, PowerShell, JavaScript, HTML, PowerShell, Python
- **Frameworks & Technologies:** .NET, .NET Framework, ASP.NET, MVC, Web API, RESTful API, SOAP, Blazor, Bootstrap, Material Design Lite (MDL), Telerik Kendo UI
- **Platforms:** Windows Server, IIS, Windows 10/11, Jack Henry Symitar (Episys), SymFormPDF, SMA OpCon, Microsoft Power BI, AIX
- **Tools:** Git, SVN, Jira, Bitbucket, Confluence, SourceTree, SQL Server Management Studio, Visual Studio
- **Databases:** Microsoft SQL Server, Data Warehousing, ETL Development, Database Design, Performance Optimization

CORE COMPETENCIES

- **Architecture:** Application Architecture, Solutions Architecture, Enterprise Integrations, RESTful API Design, System Modernization. Thoughtful and intentional design at every level. Maintain data integrity, build robust data access layers, implement efficient and secure applications, design responsible system integrations, and streamline automations and dataflows from start to finish.
- **Data Platforms:** SQL Server, Data Warehousing, ETL Development, Reporting Architecture, Power BI. Responsibly shepherd data from systems to the users to empower them to make informed business decisions. Extract, Transform, and Load data from multiple systems to create a complete view.
- **Development:** Full Stack, Full SDLC, Agile Delivery, Business Process Automation, Database Development, Documentation. Design and implement entire systems and automations of interconnected applications and data sources. Consider each user at each step in the flow of information in an environment.
- **Leadership:** Team Management, Hiring, Performance Reviews, Code Reviews, Career Development, Mentorship, Technical Roadmaps. Lead by example with a decade of experience building and curating the environment, from the simplest report to major database overhauls. Mentored and managed by challenging developers to grow and improve themselves with rewarding projects, encouraging co-ownership of the codebase, and providing structured professional development plans to grow and advance.

SELECTED ACHIEVEMENTS

- **Enterprise Application Platform:** Architected and built an internal web application platform from the ground up including authentication, authorization, and centralized application management supporting 100+ employees and multiple business-critical applications.
- **Courtesy Pay Solution:** Served as the sole technical resource responsible for designing and implementing the organization's Courtesy Pay solution within Symitar. Deliverables included a robust and efficient eligibility evaluation program that had to evaluate dozens of datapoints on accounts for 70,000+ members. The solution remains in production with minimal modification years after deployment.
- **Data Warehouse:** Rebuilt, standardized, and expanded enterprise data warehouse infrastructure and reporting system supporting hundreds of reports and dozens of Power BI users. Designed databases and systems capable of scaling with the organization from \$500 million to \$10 billion
- **Historical Data Archive:** Designed and implemented an archival database strategy preserving 12 years of transaction history while reducing production reporting data volume by approximately 80 percent.
- **Member Information Automation:** Redesign member name and address maintenance processes within the primary transaction processing and account management system, reducing manual effort by up to 80 percent and improving member experience through holistic system-wide account updates.
- **Enterprise Integrations:** Designed integrations involving loan origination systems, document management platforms, address verification services, forms platforms, reporting systems, and custom-developed applications.
- **Leadership Development:** Selected for and completed internal Leadership Development Program.

PROFESSIONAL EXPERIENCE

- **Patriot Federal Credit Union** Chambersburg, PA
System Architect Manager *October 2025 – Present*
 - **Leadership:** Manage a team of 3 software developers including hiring, onboarding, mentoring, performance reviews, compensation recommendations, and career development.
 - **Architecture Ownership:** Design architecture and oversee lifecycle management of more than 40 production .NET applications and multiple production databases supporting critical business operations.
 - **Strategic Planning:** Define development standards, application architecture, integration strategies, and technical roadmaps aligned with organizational goals.
 - **Developer Growth Program:** Created a structured developer career-path framework defining competencies, advancement criteria, mentorship expectations, and promotion readiness standards.
- **Patriot Federal Credit Union** Chambersburg, PA
Lead Software Developer *March 2022 – October 2025*
 - **Technical Leadership:** Led enterprise application initiatives, code reviews, architectural planning, modernization efforts, and development standards.
 - **Solution Design:** Partnered with business stakeholders to design scalable applications, integrations, workflow automation solutions, and reporting platforms.
 - **Mentorship:** Lead team of developers by example and with high expectations. Established standards for multiple platforms and disciplines across the full technology stack.
- **Patriot Federal Credit Union** Chambersburg, PA
Software Developer *May 2016 – March 2022*
 - **Primary Development Resource:** Served as the sole software developer supporting enterprise applications, integrations, reporting platforms, and database systems.
 - **Enterprise Development:** Designed and developed applications, APIs, SQL Server databases, reporting systems, automation processes, and third-party integrations.
 - **Operational Ownership:** Functioned as the sole software developer for several years while supporting a growing portfolio of scaling business-critical systems.
- **Patriot Federal Credit Union** Chambersburg, PA
Software Development Intern *May 2015 – August 2015*
 - **Development Support:** Exposed to the full software development life cycle (SDLC) and assisted with software development, testing, troubleshooting, documentation, and application support activities.
 - **Summer Project:** Developed application to retrieve and store download statistics from Google Play Store for the credit union's online banking mobile app, leveraging APIs and SQL Server.

EDUCATION

- **Penn State University**
Bachelor of Science, Information Sciences and Technology *2012 – 2016*
 - **Focus:** Programming and Application Development
 - **Minor:** Security and Risk Analysis
